Background Information

Sprengstoff Recordings from Berlin strikes again with another dancefloor bomb.

4 tracks ragga jungle deluxe. Sumone is a talented producer from Indianapolis/ USA and knows how to rock.

His style is influenced by the extreme amen programmings of old skool jungle hero Remarc. He has already released tracks on JungleXpeditions Records (JXR002), a label from Chopstick Dubplate, together with 16AJ and another split 12 inch on Mos-Hi 001 with Jahba.

On the current record Sumone shows how much variety can be in ragga jungle tunes. All of the tracks combine the relaxed vibe of reggae/ ragga music with the aggressiveness of wild amen percussions.

"Murdarah" starts with some WuTang vs The Warlord soundclash till a big badass bassline and amen thunder are unleashed.

"Freak out" starts with some nice rocksteady part with horns and then turns to some evil amen abuse with reversed jungle basses and psychedelic dub sounds. Close your eyes and feel ninetyfour!

"Hush the fuck up" is a jump up flavored ragga jungle track with rolling basses and some nervous voice sample loops which push the whole track forward.

As last track "Summertime bad bwoy" (with the legendary ska-punkrock band Sublime battling Cutty Ranks) is a sweet amen roller with the vibe to get everybody on the dancefloor.

Mp3 files can be found on the homepage of the label.
